

10 September 2008

Kryso Resources plc
('Kryso' or 'the Company')

AIM: KYS

Issue of Incentive Options Over Unissued Ordinary Shares

Kryso Resources PLC announces that its Remuneration Committee awards an additional 4,200,000 options to the directors to purchase new ordinary shares of 1 pence at an exercise price of 10 pence per share in the capital of the Company.

The options have been awarded as at 10 September 2008 and have been issued to incentivise and retain key management and directors at this time of severe global skills shortages throughout the mining industry.

The Options are granted in accordance with the rules of The Kryso Resources PLC Unapproved Share Option Scheme, and may be exercised after twelve months, and expire after four years.

The Directors' total holding of options are now as follows:

	Exercise Price	Options
Dr. Trevor Davenport	10p	650,000
Dr. Trevor Davenport	15p	200,000
Ferdinand Dippenaar	13p	400,000

Background Information on Kryso Resources plc

Kryso Resources controls 100% of the exploration rights to the Pakrut gold project, which lies within the highly prospective Tien-Shan gold belt. Kryso also controls 100% of the exploration rights to the Hukas nickel-copper project.

The Company is managed by a team with a proven track record of operating in Tajikistan, which it considers to be among the most attractive operating environments in Central Asia.

The main deposit at Pakrut currently has a JORC-compliant resource in excess of one million seven hundred thousand ounces of gold and the Company aims to increase this resource with a further. Drilling at Pakrut continues to return exciting intersections, including 123.7m @ 6.14g/t, 42m @ 11.17g/t and 50m @ 5.67g/t Au.

The Company envisages annual production for 2010 of 100,000 oz per annum from a combined open pit and underground mine.

A geophysical survey over a large section of the Hukas nickel-copper project has been completed, and a drill programme is currently underway.
